

Welcome to our Practice!

We are pleased that you have chosen DeKalb Denter Center for your dental needs. We are always excited to see new smiles coming through our doors! Our office provides preventative care, as well as restorative care. Our primary goal is always the rentention of your healthy, natural teeth, if at all possible.

During your first visit, a comprehensive examination will be completed. This exam will include a review of your medical and dental history, an oral cancer screening and necessary x-rays allowing us to diagnose the overall condition of your mouth, teeth and gums. Once your dental condition is determined, we will discuss our findings with you and develop a suitable treatment plan. You will then be scheduled an appointment according to your dental needs.

Please be prepared for your initial appointment by printing and completing the ***Patient Registration*** form, the ***Notice of Privacy Practices form*** and the ***Financial Agreement*** forms found on our website. If you are unable to complete the forms prior to your visit, please arrive 15 minutes before your scheduled appointment in order to complete the registration forms.

If you have dental insurance, please bring your insurance card. If a card is not available, please have all the pertinent insurance information, such as provider name, provider address, provider phone number, subscriber ID number, etc.

Should you have any questions about our practice, our services or policies, please do not hesitate to contact our office. We look forward to your visit!
